Our work > Activities > Circular economy in cities

Circular Economy in Cities is a suite of online resources which provide a reference point for urban policymakers.

As major engines for economic growth, cities can drive the circular economy agenda forward to unlock economic, environmental, and social benefits. Alongside Sustainable Development Goals and climate objectives, the transition to a circular economy will support city leaders as they deliver against their priorities, which include housing, mobility, and economic development.

The Circular Economy

Humans Changed the Face of Earth, Now We Rethink Our...
934 050 vues · 8 y 1 m

What is the circular economy? What does it look like in practice? Who's doing it now? And how can you get involved? This week, the Ellen MacArthur Foundation launches a three-part video series that explores what the circular economy really means for businesses, people and society, and some of the most innovative examples of it in action today.

Presented for the occasion of a whole new edition of our LIVRE LA SUITE

What is the circular economy? ▶ TOUIT REGARDER

The circular economy is based on three principles: design out waste & pollution, keep products & materials in use and regenerate natural systems.

LEARNING HUB

Let us guide you through these curated learning experiences. Expand your understanding of the circular economy and learn how the concept can be applied to different parts of the economy.

FILTER BY: Topic ▾

CLEAR FILTER ✕

WHAT IS THE CIRCULAR ECONOMY?

Learn about the three principles that are the foundation of the circular economy concept and some of the benefits of shifting away from the current, linear, economy.

THE CIRCULAR ECONOMY IN DETAIL

Dive into the details of the concept of the circular economy to understand its history, its nuances, and the benefits it offers to business, society, and the environment.

FOOD AND THE CIRCULAR ECONOMY

Learn about the true costs of the current food system and the catalytic role cities can play in creating a healthy, resilient system based on natural processes.

Stay in the loop

[Participant Name], [City]

	Vision (strategies & roadmaps)	Engagement (convening & partnering, awareness raising, capacity building)	Urban management (urban planning, asset management, public procurement)	Economic incentives (financial support, fiscal measures)	Regulation (regulation & legislation)
How are policy levers in this category being used to accelerate the circular economy in your city?	<i>"We don't have a strategy or roadmap yet but we have commitment from our Mayor"</i>				
What are some of your favourite examples of policy levers, in this category, in action?					

How relevant are levers in this category to your city context? Could you apply them easily?	<i>Very relevant - we produce strategies for all major new initiatives</i>			<i>There may be opportunities to incorporate circular economy into existing covid recovery grants</i>	
What are some ideas that you would like to explore further?	<i>How do we best disseminate the strategy when it's done?</i>
